CUSTOMER APPRECIATION DAY

4/15/2000

Spring is in the air!

Light showers didn't stop a great turn out at this Spring's open house. The pulled pork sandwiches under the tent and a surprise appearance by singer Ron Jones made for a great day.

No pressure on Fred Slattery (H.O.G. Chapter Director) as he cruises to a 2nd place finish in the Pinball Tournament while Dick and George (from Tibby's) and Chapter members Paul and Frank look on.

A total of \$64.50 was donated to the Food Bank of Western Mass.

Three Springfield H.O.G. Chapter members hanging out. L to R : Robin - Ladies of Harley representative, Tracy - from Tibby's and Cathy - Chapter Secretary and Editor.

Despite the occasional shower, many poeple showed up on their motorcycles.

Good food and music underneath the big top.

Jason (L) and Ryan helping out at the cash wrap ...

While Jon (L in orange/black shirt) and Shane handle the main counter.

Thanks to all who turn out for another fun event!

The U.S. economy to 2005.
Saunders, Norman C.
Monthly Labor Review (Mon Labor Rev) v. 118 (Nov. '95) p. 10-28
WORD COUNT: 11151

(USE FORMAT 7 FOR FULLTEXT)

...ABSTRACT: Under the assumptions used by the bureau in developing these projections, by 2005 gross domestic **product** is projected to range between \$6.4 trillion and \$7.4 trillion (in 1987 dollars...

TEXT:

... to uncertainty in future periods.
The moderate-growth projection is characterized by a gross domestic **product** (GDP) influenced by somewhat slower labor force growth than currently exists, an improving balance of...

...reviews of past projection efforts have indicated that certain sectors of the economy--notably, durable **goods** consumption and investment in equipment and structures--are overstated when no cycle is present. Consequently...

...and 1987, there was a resurgence of spending on defense preparedness. Real defense purchases of **goods** and services grew at an annual rate of 4.5 percent. A large proportion of...

...the development of the B-1 bomber, increased air wing size, and more advanced rolling **stock** (for example, new tanks and troop ...spending up in real terms. As a result of these assumptions, real spending on military **goods** and services is projected to drop at an average annual rate of 0.4 percent between 1994 and 2005.

Federal spending on nondefense purchases of **goods** and services grew at a real rate of 2.3 percent a year between 1983...

...been for medicaid-related grants. Between 1983 and 1994, real grants-in-aid for nonmedicaid **items** grew by 1.3 percent per year. This category of grant spending is expected to...

...the entire projection period. The high-growth and low-growth alternatives embody fiscal assumptions that **cover** a much broader range of possibilities for the deficit--from a slight budget surplus by...1983 to 1994. That period is used in all of the major tables in this **article**. However, no one historical period can adequately describe the events shaping the behavior of all of the individual variables considered in the projections. For that reason, the text of the **article** may refer to other, more representative, historical periods.

In the moderate-growth alternative, several of...

...the determination of funds available for investment growth in the U.S. economy, will be **covered** more fully later; here, it suffices to say that the result has been a personal consumer spending surge focused on durable

goods (notably, automobiles and consumer electronics) and on a vast array of consumer services (primarily medical...
...to taper sharply. Some interesting shifts in the composition of personal consumption expenditures by major **product** categories, however, are expected. (See table 3.)

Current population projections published by the Bureau of...

...in 1994 to 3.5 percent by 2005.

The remainder of consumer spending on durable **goods** encompasses personal computers, household furniture, and all other durable **goods**. Computer spending is projected to continue at a very rapid pace throughout the projection period...of china, glassware, and utensils, as well as all purchases of household audio and video **products**, is projected to slow somewhat from the strong growth experienced during the 1983-94 period...

...6.0 percent in 1994 to 6.7 percent in 2005.

Spending on other durable **goods** covers a broad range of recreational **products** and vehicles, ophthalmic **goods**, jewelry and silverware, and more. This category of spending grew at a real annual rate

...

...consumption by 2005.

Consumer spending on nondurables is generally made up of so-called subsistence **items** such as food, cleaning **products**, cosmetics, and other short-term consumables. As family incomes rise, expenditures on nondurables also rise, up to a point. After that point is reached, spending on these **items**, at the household level, tends to increase much slower than rises in income. Generally, improving...

...expenditures to 31 percent. This is not, of course, to say that spending on these **items** declined numerically; rather, it simply grew at a significantly slower pace than did overall personal...expenditures on producers' durable equipment--machine tools, construction equipment, industrial apparatus--in short, all those **items** of which U.S. industries have traditionally been strong world suppliers. Between 1983 and 1994, this category grew by 4.3 percent a year, increasing its share of gross domestic **product** from 5.5 percent in 1983 to 6.4 percent by 1994. Growth is expected...

...In the 1950's and 1960's, almost all U.S. foreign trade was in **commodities** or manufactured **goods**, which were transported by sea. Trade barriers took the form of tariffs and quotas. Most...

...one country, and trade tended to be protected vigorously. In 1960, real gross exports of **goods** and services accounted for 3.7 percent, while gross imports were 4.9 percent, of...

...thus blurring the definition of a national firm. Also, trade in intellectual property, technology-intensive **goods**, and a wide array of services began to change the **product** landscape, and by 1994 trade regularly took place among a much broader array of countries...

...a much larger market. For consumers, the new developments have meant wider choices, higher quality **goods**, and lower prices.

By 1983, real exports had jumped to account for 7.3 percent...business cycle fluctuations. The clear trend, however, is for a rough stabilization in the real **merchandise** trade deficit and for significant increases in the surplus in foreign trade services, as shown...

...Trade surplus or deficit (-)

1983 1994 2005

Gross trade -56.1 -110.7 -15.7

Merchandise -68.2 -161.6 -153.7

Services 12.0 51.1 138.0

By end-use category, the major areas of growth in exports are expected

to be capital **goods** , services, and consumer **goods** ; all are projected to increase, their share of gross exports by significant amounts in the...

...to moderate somewhat in many categories, with the largest dropoffs in the growth of capital **goods** and consumer **goods** .

In sum, the improvement in U.S. foreign trade seen during the latter half of...

...that reason, significantly different trends in foreign trade are examined more closely later in the **article** .

Federal Government. During the past decade, the debate over the Federal budget has been dominated...

...average annual growth of 2.7 percent between 2000 and 2005.

Federal nondefense purchases of **goods** and services--real spending on salaries and on administrative expenses of all Federal nondefense programs ...

...year between 1994 and 2005, compared with the 2.3-percent annual growth for this **item** between 1983 and 1994.

These assumptions lead to a projected nominal growth between 1994 and 2005 of 3.9 percent per year for all purchases of **goods** and services, virtually identical to the 3.8-percent annual growth posted over the preceding...

...a less-than-25-percent share by 2005.

Other categories of expenditures beyond purchases of **goods** and services are expected to grow more substantially over the projection period. These include medical...

...of revenue collection may be modified or replaced.

State and local government. Real purchases of **goods** and services by State and local governments increased their share of GDP steadily throughout the...

...led to further slowdowns in Federal grants. As a result, State and local purchases of **goods** and services again receded to a share of 11.0 percent of GDP by 1994...needs and expansion of the medicaid program. As a result, State and local spending on **goods** and services is expected to fall just slightly as a share of GDP over the...

...investment during the projection period. In fact, this increasing share of current spending on capital **goods** is enough to generate a growth in real capital per employee of 1.7 percent...scenarios. (See table 1.)

Fiscal policy. In the low-growth alternative, real defense purchases of **goods** and services are assumed to decline over the entire projection period to \$203.5 billion...

...high deficits and the need to gain some control over Federal spending, nondefense purchases of **goods** and services in the low-growth scenario are assumed to be flat over the forecast...

...to promoting awareness of and ameliorating the environment. In this scenario, real nondefense purchases of **goods** and services are assumed to grow at an annual rate of 1.4 percent, resulting...somewhat stronger growth in labor force participation, a major shift toward the production of investment **goods** , and a moderate rate of inflation. The result is a GDP of \$7.4 trillion...

...scenario. Higher interest rates and lower income growth result in particularly adverse effects on durable **goods** spending. Purchases of motor vehicles and parts are projected to grow in real terms at...

...than the moderate-growth scenario rate of 1.5 percent, and spending on other durable **goods** is projected to increase at a 3.3-percent annual pace, slower than the 4...

...offset slightly by less-than-average slowdowns in purchases of clothing,

one of the "subsistence" **items** of consumer spending and typically the last to be cut during slow economic periods.

In...

...percent figure is almost as deep a slowdown as is projected for purchases of durable **goods** in the low-growth alternative.

Expenditures on housing and electricity are expected to grow by...

...growth. Increases in share are projected for expenditures on housing, energy, food, and other nondurable **items**.

The less favorable economic conditions in the low-growth projection slow investment spending relative to...exports are projected to grow slightly less rapidly than in the moderate-growth scenario, capital **goods** and autos and parts are expected to increase their share of overall exports of **goods** and services somewhat relative to their share in the moderate-growth scenario, as the other...

...the high-growth alternative, but the greatest impact of high income growth is in durable **goods**, primarily autos and housing. Spending on motor vehicles and parts is expected to increase at...

...in the moderate-growth alternative, as higher income growth tends to go more toward luxury **items** than to basic subsistence **items**. Growth in consumer services is projected to be 0.5 percentage point higher in the... that projected in the low-growth scenario--together with its impact on the productive capital **stock**, is attributable primarily to the lower inflation, the sharp reduction in the Federal deficit, and...

...impact on exchange rates and the consequent growth in demand for exports. Overall, exports of **goods** and services are projected to increase at an average annual rate of 7.3 percent...

...in Eastern Europe, China, and other areas of the world.

Although domestic demand for imported **goods** is expected to continue at a brisk pace in the high-growth alternative, export growth...in the high-growth scenario. Stronger-than-average growth is projected for exports of capital **goods** and industrial supplies and materials. Imports are expected to continue to grow strongly, buoyed by strong income growth and demand for many **products** not manufactured in the United States, but import growth is tempered, to a certain extent, by lower exchange rates and the consequent higher prices for imported **goods**.

The net effects of the high-growth alternative are a projected GDP growth of 3...

California's ephemeral vernal pools may be a good model for speciation.

Baskin, Yvonne.

BioScience (BioScience) v. 44 (June '94) p. 384-8

WORD COUNT: 4096

(USE FORMAT 7 FOR FULLTEXT)

TEXT:

... ecologist Ellen Bauder knelt in the parched remains of a small puddle on a brush- **covered** San Diego mesa. She picked a tiny, brittle branch, crushed it in her palm and...

...being overrun by the auto dealerships, strip malls, and high-rise office buildings that now **cover** most of the coastal mesa.

Yet, this fragment of mesa is home to one of...after California's coastal mountains began to rise and the shallow inland sea that once **covered** the Central Valley receded and was replaced by large freshwater lakes. Continuing uplift elevated the...

...really get a foothold. And that's where vernal pool plants probably evolved. The area **covered** by vernal pool habitat would fluctuate through the millennia. Today, that has receded back to...

...do large tracts of vernal pools remain, Griggs notes. The Jepson Prairie Reserve, for instance, **covers** several thousand acres south of Davis and is surrounded by approximately 10,000 acres of vernal pools on private rangeland near Travis Air Force **Base**.

ADAPTING AND ENDURING

The combination of impervious soils and an arid climate greatly restricted the species that could...

...found its own mechanisms for enduring the vagaries of the habitat. "If you've got **temporary** wetlands in an arid land, you can't get marsh species because it's too nonpool plant. "Pogogyne's morphology is typical of **things** that grow underwater that don't belong there," he notes. When the pools dry, the...

...the water stands so long it dies," Bauder says. "The same with Downingia."

The one **thing** neither Downingia nor Pogogyne is prepared for, however, are late spring storms that flood the...

...species seem to occur together. "We have little bits of information for all of these **things**," Simovich says. "But right now we don't have a big picture.

"Some larger pools...what we see now and not on the basis of the conditions under which these **things** evolved," Simovich says. "But we're just seeing the remnants. We can't look at...

...the initial premises of island biogeographic theory--that there is some gene flow."

"The other **thing** we're seeing is that pool size may have a larger effect than distance in...
